A Press Technician operates and provide limited minor preventative maintenance of presses and other machinery and occasionally monitors as many as four presses or two Production cells. A Press Technician I follows established run mode practices.

Major Responsibilities:

- Safely, operate and tend manufacturing cells while producing quality parts. Operation involves knowledge of press controls, non-conforming procedures and documents, log books and the ability to operate equipment at optimal speed without compromising product quality or equipment maintenance. Technician is required to check finished parts, empty parts containers into hoppers, and shut-down operation whenever deficiencies in quality or equipment operation are noted.
- Uses precision measuring instruments (caliper, micrometer, plug gauges, bore micrometer, dial indicator height gauge) to ensure that parts meet customer specifications.
- Maintain cleanliness in and around press and work area. Involves cleaning scrap from inside and outside of press upon order completion. In addition, whenever visible signs of debris, oil, coolant or any slippery conditions or substances are present, area must be mopped clean and an attempt made to discover and eliminate the source of any leaks.

- Perform minor and limited preventive maintenance such as lubrication and auditing for loose parts and visible defects in equipment.
- Load and unload raw material from stock reel or palletizer, following safety guidelines and using personal protection equipment such as gloves. Includes the responsibility to verify that material tags match the specifications required. Requires the safe & effective use of fork lift, overhead hoist, coil hook, stock reel, coil straightener and banding apparatus.
- Required to read and interpret part prints and understand the correlation between the print and critical dimensions upon which SPC charts are based. Includes an understanding of the use of SPC computer system and the basic principles of our SPC customer requirements.
- Records production, material, and quality information on designated JSC operating systems and in accordance with JSC operating procedures. Involves an understanding of the purpose and necessity for accurate record keeping and JSC inspection plans and statistical process control (SPC) charts.
- Through the safe operation of Powered Industrial Vehicles, transport material (raw stock, scrap, and finished parts) when necessary.
- Other duties as assigned by supervisor for additional experience and/or training or refinement skills or in preparation for advancement.
- Occupation includes a requirement to attend and participate in team meetings and training programs.
- Participates in JSC's Continual Improvement Process.
- Occupation includes a requirement to follow Environmental Health & Safety procedures.

Required Qualifications:

EDUCATION: Math, problem solving, mechanical and reading competency.

EXPERIENCE: No Industrial experience required
