## First Shift \$15.34 to \$23.02

## Second Shift \$16.49 to \$24.74

Starting wages dependent on skills and experience. This position is part-time and shift / hours can be chosen by employee and manager of department.

## **Major Function:**

To provide general maintenance, repair, part replacement and preventive maintenance to the physical facility and associated production and office equipment

To clean, thoroughly inspect, and problem solve maintenance activities in order to improve equipment performance, reduce equipment downtime, reduce maintenance costs and improve internal customer satisfaction.

Identify, evaluate and establish corrective actions, preventive maintenance practices and training.

## Major Responsibilities:

Performs repair and mechanical component replacement on presses, machine tools, forklifts, hoists, material reels, conveyors, compressors, washers, scales and other production equipment within the plant.

Diagnose mechanical malfunction and develop a plan for corrective action. Corrective action can involve dismantling equipment, removal of defective or broken components, the repair of the component, construction of a replacement part, replacement of defective components and/or associated parts, and the reconditioning of equipment to full operating order.

Assist with the repair and/or replacement of electrical or electronic devices or controls associated with defective equipment. May require the removal and replacement of defective devices or re-wiring "to and from" a control.

Performs general maintenance, preventative maintenance, repair and installation of equipment and support devices associated with the physical facility.

Construct, repair and/or replace items such as support brackets, ceiling panels and wall coverings, bulletin boards, windows, doors, pneumatic air lines, water and sprinkler lines, electrical conduit, light cords, ballasts, light fixtures, electrical outlets and switches, and HVAC mechanical, ducting and filtering systems.

Assist in the site preparation, and the installation of new equipment. Includes the installation of pneumatic air and water lines, electrical conduit and outlets, mounting pads and connection of services to the new equipment. May include the removal of shipping crates and packing materials, moving and locating equipment to the site, and connecting mechanical and utility support.

Assist in the construction and installation of utilities and support equipment in new physical plant construction. Includes the installation of electrical conduit, HVAC ducting, sprinkler and waterlines, electrical outlets, switches, doors, windows and office or production equipment.

Perform maintenance of the external building and surrounding property. Includes the repair and replacement of doors, windows, preventive maintenance of dock doors and hoists, parking lot striping, and exterior building surface or roofs.

Requires the exercise of the skills and the use of the tools normally associated with several trades such as carpentry, plumbing, welding, machine repair, masonry, machinist and mechanic.

Participates in JSC's Continual Improvement Process.

Other duties as assigned by supervisor for additional experience and/or training or refinement skills or in preparation for advancement.

Occupation includes a requirement to follow all Environment Health & Safety procedures.

### **Qualifications:**

<u>EDUCATION</u>: Math, problem solving, mechanical and reading competency. High School diploma. Specialized Vocational training in an area such as mechanics, welding, machine repair etc. a plus. EXPERIENCE: 2-3 years industrial or mechanical repair experience.

EXPERIENCE. 2-5 years industrial of mechanical repair experience.

If you desire the chance to make a difference and to work with great people who value teamwork, challenges and the ability to impact the future of the company please apply on line at www.jagemann.com.
