

Jagemann Stamping Company

Our Quality Philosophy

Just the Best

People, Customer Service, Technology

JSC's Quality Management System - Scope

The purpose of this manual is to describe the policies and company-wide control structure of the Quality Management System (QMS) used at Jagemann Stamping Company to assure that customer specific requirements and the needs and expectations of relevant interested parties are met or exceeded. The QMS described in this manual addresses the requirements of ISO 9001 and IATF16949. The manual includes responsibilities and authorities for all major processes and references additional Quality System Procedures (QSP) used in the maintenance of our QMS. Portions of the Systems defined within these documents overlap and are integrated with the EHSMS. Jagemann Stamping Company produces draw, fineblank and progressive die metal stamping for Fuel line quick connects, fuel injector cups, solenoid housings, variable valve timing components, sealing flanges

JSC's Quality Management System - Exclusions

The clauses of 8.3 Product Design are not applicable to the scope of JSC QMS because Jagemann Stamping is not responsible for Product Design & Development, our customers provide the design requirements.

JSC's Quality Policy

The people of Jagemann Stamping Company are dedicated to customer-focus by providing high quality products, on time, at a fair price based upon mutually agreed to requirements.

We are committed to strengthening our customer-focus and the pursuit of common goals through teamwork and continual improvement.

JSC's EHS Policy

Jagemann Stamping Company is dedicated to the continual improvement of the environment and health & safety of its employees, the prevention of pollution, injury, illness of its employees, and compliance of with all applicable legal and other requirements.
